Mobile Networks

- Our Mobile Network Products have IPv6 support to
 - provide the User Equipment (Mobile) IPv6 Internet access
 - function when the underlying network is IPv6
- IPv6 continues to be an important building block for mobile networks
 - Important for future flexibility in network deployment

Working in the modern world

- Ericsson has offices all over the world
 - Working with many customers and partners worldwide
 - Including in countries where IPv6 is becoming a necessity for reachability
- Transformation of Office IT-environment for employees towards one that just assumes Internet Access
 - Support work from anywhere, including home, on the road etc.
 - IPv6 will become a necessity long term for reachability

IPv6 in Sweden

- IPv6 Competence
 - Ericsson have 14000 Employees in Sweden
 - Need IPv6 familiarity and competence
 - Benefits from ubiquitous IPv6 access
- 50 Billion Connected Devices
 - We have a vision of large number of connected devices worldwide, that will require IPv6 to fulfill
- IPv6 needed to prevent inefficiencies
 - Reaching worldwide
 - Reduce network complexities
 - Provide flexibility
