**Agreement between
the Norwegian Telecommunications Authority, Norway and
the National Post and Telecom Agency, Sweden
concerning the use of the frequency bands 890-915/935-960 MHz**

Agreement between the Norwegian Telecommunications Authority, Norway and the National Post and Telecom Agency, Sweden concerning the use of the frequency bands 890-915 / 935-960 MHz

Section 1 - Use of channels from 6 July 1997

- 1.1 Norway may use the GSM channels 41-63 and 81-103 without coordination with Sweden, if the field strength of every single carrier produced by a base station does not exceed 36 dBuV/m at the Swedish coastline or border south latitude 61 N or at Kosteröarna.
- 1.2 Norway may use the GSM channels 41-63 and 81-103 without coordination with Sweden, if the field strength of every single carrier produced by a base station does not exceed 55 dBuV/m at the Swedish border north latitude 61 N.
- 1.3 Sweden may use the GSM channels 25-39, 65-79 and 105-119 without coordination with Norway, if the field strength of every single carrier produced by a base station does not exceed 36 dBuV/m at the Norwegian coastline or border south latitude 61 N or at Hvaleröarna.
- 1.4 Sweden may use the GSM channels 25-39, 65-79 and 105-119 without coordination with Norway, if the field strength of every single carrier produced by a base station does not exceed 55 dBuV/m at the Norwegian border north latitude 61 N.
- 1.5 Norway may use the GSM channels 24-39, 64-79 and 104-119 without coordination with Sweden, if the field strength of every single carrier produced by a base station does not exceed 19 dBuV/m at the Swedish coastline or border or at Kosteröarna.
- 1.6 Sweden may use the GSM channels 40-63 and 80-103 without coordination with Norway, if the field strength of every single carrier produced by a base station does not exceed 19 dBuV/m at the Norwegian coastline or border or at Hvaleröarna.
- 1.7 Sweden may, after coordination with the Norwegian GSM operator concerned, without any obligation to inform the Norwegian Telecommunications Authority, use the GSM channels 24, 64 and 104 with a field strength exceeding 19 dBuV/m, but not 36 dBuV/m, at the Norwegian coastline or border or at Hvaleröarna.
- 1.8 Norway may, after coordination with the Swedish GSM operator concerned, without any obligation to inform the National Post and Telecom Agency, use the GSM channels 40 and 80 with a field strength exceeding 19 dBuV/m, but not 36 dBuV/m, at the Swedish coastline or border or at Kosteröarna.
- 1.9 Norway may use the GSM channels 54 and 87 without coordination with Sweden, if the field strength of every single carrier produced by a base station does not exceed 50 dBuV/m at the Swedish coastline or border or at Kosteröarna.

1.10 Sweden may use the GSM channel 79 without coordination with Norway, if the field strength of every single carrier produced by a base station does not exceed 50 dBuV/m at the Norwegian coastline or border or at Hvaleröarna.

1.11 The frequency band 890 - 895,1 / 935 - 940,1 MHz (GSM channels 1 - 25) may be used for the NMT-system after coordination between the operators.

Section 2 - General

2.1 A field strength exceeding above mentioned levels shall be coordinated with the other country.

2.2 Preliminary coordination may take place between the GSM operators concerned. The results from preliminary coordination between operators must be approved by the administrations.

2.3 The above mentioned field strength values are to be calculated at a receiving antenna height of 1.5 m and for 50 % of time and 50 % of locations.

2.4. A complaint in case of interference shall be based on the median values of measurements of field strength performed at least on two different occasions over a range of at least 100 m of the tangent of the wave propagation of an interfering base station. Measurements of field strength shall refer to the coastline.

Section 3 - Revision

3.1 This agreement may be revised or cancelled as desired by one of the administrations with a notice of three months if frequencies are to be transferred from the NMT-system to the GSM-systems.

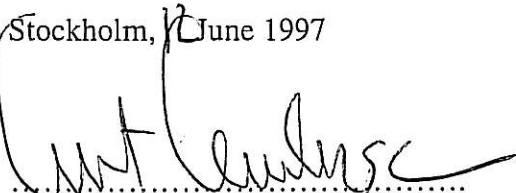

3.2 This agreement may otherwise be revised or cancelled as desired by one of the administrations with a notice of one year.

3.3 If no agreement is reached then, CEPT Recommendation T/R 20-08 shall apply.

This agreement has been drawn up in two identical copies, one for Norway and one for Sweden.

Stockholm, June 1997

Oslo, June 1997
